

## Family Medicine Resident Handbook

Julie Merriam DO, Program Director  
Allison Abresch Meyer DO, APD/DOE

Version 2023-2024  
Updated 6/27/2023

This handbook is provided to prospective and current residents for information and guidance. The main purpose is to describe our residency and address common questions concerning our program and it will be updated annually to ensure accuracy. Please let us know if you have suggestions for things to include. This handbook is not meant to supersede SRH policies- however sometimes residency training requirements from ACGME do dictate differences. Please refer to the resident contract first, then the resident handbook, and ask for clarification if there's any confusion. Thanks to our faculty and chief residents for helping edit this manual!

## Section 1— Sponsoring Institution— Skagit Regional Health

### Overview of Skagit Regional Health

Skagit Regional Health (SRH) is a healthcare leader in northwest Washington state, providing advanced technology and high quality, patient-centered care to the people of Skagit, Island and north Snohomish Counties. The providers, clinicians and staff who provide compassionate care to patients in our facilities live and play in the communities they serve.

The SRH system includes two inpatient facilities, Skagit Valley Hospital in Mount Vernon and Cascade Valley Hospital in Arlington, as well as approximately two dozen outpatient clinics in our three county service area. Descriptions of each facility and the services offered can be found on the SRH website [Home \(skagitregionalhealth.org\)](http://skagitregionalhealth.org).

---

### Meeting Resident Needs

Skagit Valley Hospital (SVH) provides two call rooms for residents to permit rest during night float. A telephone and computer are present in the call rooms and toilet and shower facilities are present or nearby. When on OB, if available, you are able to use a clean patient room to rest and document as needed.

If a resident is too tired to drive home safely or road conditions are poor (snow/ ice) - safe options provided are the call rooms, the GME house on campus (accessible through resident manager), or reimbursement for taxi to get home (contact Tami Gilbert, GME).

In order to provide a supportive environment for breastfeeding, a resident may use the call rooms or the lactation room in the hospital. For milk storage, the fridge in the GME kitchen and the FM Residency Clinic kitchens are both available. Breaks will be available as needed (generally one patient is blocked in clinic schedules in the morning and afternoon), and most didactic presentations can be viewed via Zoom. You are also welcome to join didactics and meetings if you are utilizing hands-free pumping devices.

SVH has a Bistro and coffee shop, and food is provided in the resident lounge for residents working nights and weekends. A food allowance is provided for residents' personal use in the Bistro during daytime work hours. This does not extend to the coffee shop.

Security Services are provided 24 hours per day, 7 days per week. The Hospital perimeter envelope will be unlocked at 0530 and locked at 2130 seven days per week. A security officer is on site in the Emergency Department 7 days per week and holidays from 1400 until 0600. The on-duty Nursing Supervisor and the Security Services Manager, or designee, coordinate all security activities within the hospital. Public access into the hospital after business hours will be via the Emergency Department entrance. Residents may enter any exterior door by means of a badge-swipe at doors with card readers.

SRH uses Epic EHR. The Medical Education wing includes didactic rooms, library, resident lounge with kitchen, locker rooms, call room, and residency staff and faculty offices. There are also multiple conference rooms available within the hospital that can be reserved.

---

## FM Continuity Clinic Site

Residents care for their own individual panels of patients at the SRC Family Medicine Residency Clinic, which is located across the street from the hospital. The clinic includes a waiting area, 8 examination rooms, procedure room, faculty/ preceptor offices, work stations for MA/ physician teams, and a break room.

---

## Library and Educational Resources

SRH provides a library and coordinator to assist residents. Library resources and services are reviewed annually by the library coordinator, who submits a report to the GME Committee. There are also some library resources located in the residency clinic.

Library resources include electronic Medline, UpToDate, medical dictionaries, major indexes, current textbooks and journals, patient education materials, practice guidelines, document services, and print materials. Journals are available in the resident lounge.

The FM residency program also has library privileges through Pacific Northwest University of Health Sciences College of Osteopathic Medicine (PNWU) and University of Washington School of Medicine (UW) through the FM Residency Network (FMRN). These provide additional electronic access to journals and professional publications as well as extensive research data through the UW Care Provider Toolkit [Care Provider Toolkit | UW Health Sciences Library](#).

Residents and faculty also have access to research scientists at PNWU and UW FMRN for assistance with any scholarly projects they are working on.

---

## Quality Measures

Skagit Regional Health is committed to providing safe, quality patient care and embraces transparency in public reporting of quality measurements and national scorecards to promote education and awareness among consumers. SRH voluntarily provides quality and pricing data to initiatives including the Washington State Hospital Association's Quality Measures Website, the Centers for Medicare & Medicaid Services' Hospital Compare website and participates in the Institute for Healthcare Improvement's 100,000 Lives and 5 Million Lives campaigns.

---

## Accreditations and Memberships

**DNV Healthcare** - SRH is accredited by DNV Healthcare under the authority of the US Centers for Medicare and Medicaid Services. Our facilities are compliant with the ISO 9001 Quality Management System. DNV (Det Norske Veritas) is an independent foundation with the purpose of safeguarding life, property, and the environment.

**The American College of Surgeons Commission on Cancer** - SRH is accredited by The American College of Surgeons Commission on Cancer. The hospital has been certified by the American College of Surgeons

since 1975, which acknowledges the hospital's high quality multidisciplinary cancer care program that meets rigorous compliance standards.

**The American Hospital Association** - SRH is a member of the American Hospital Association, a national organization founded in 1898 that represents and serves not only nearly 5,000 hospitals but also health care networks, patients and communities. The American Hospital Association serves as an educational resource on health care issues and trends for leaders at SRH.

**The Washington State Hospital Association** - The Washington State Hospital Association is a membership organization representing community hospitals and several health-related organizations. The association provides issues management and analysis, information, advocacy and other services.

**Seattle Cancer Care Alliance** – The Skagit Regional Health Cancer Care Center is honored to be selected as just the second network affiliate of the Seattle Cancer Care Alliance, a partnership of three world-renowned cancer programs, Fred Hutchinson Cancer Research Center, UW Washington Medicine and Children's Hospital and Regional Medical Center. As a network affiliate since 2005, our providers and patients benefit from the resources, research, clinical trials and treatment options of the Seattle Cancer Care Alliance while in treatment here at the Cancer Care Center in Mount Vernon.

## Residency Accreditation

ACGME (Accreditation Council for Graduate Medical Education) since July 2017, with Osteopathic Recognition since July 2018. We accept both DO and MD residents, students, and faculty.

Formerly AOA (American Osteopathic Association)-accredited program 2011- 2019. First residents in 2012.

SRH is our "Sponsoring Institution" and currently sponsors both FM and IM residency programs. FM is accredited for 12 residents total (4 in each class), and IM for 21 residents total (7 in each class).

Fax: 360-814-6266

### Dorothy Cozakos, RN

RN Clinical Supervisor, FM and IM Residency Clinics

Email: [dcozakos@skagitregionalhealth.org](mailto:dcozakos@skagitregionalhealth.org)

Phone: 360-814-7283

## Residents

**Full FM Resident Roster:** There is an Annual Resident Roster for all FM (and IM) residents with pictures and contact phone numbers. This is updated each year and distributed widely in the hospital and clinics.

**Chief Resident(s):** The FM Chief Resident is a third year resident peer selected in the second half of the academic year of their PGY2 year. This is to ensure that the incoming chief has the opportunity to work with the outgoing chief for a time to ensure continuity with any active projects. This is a voluntary position with a small monthly stipend. The Chief Resident sets a high standard of professionalism and communication. The Chief Resident attends an FM Chief Residents' conference at UW in the Spring and Fall to help develop professional leadership skills and network with other resident leaders in the WWAMI region.

The Chief Resident plans the call schedules, leads resident meetings, represents their peer group on the GMEC (Graduate Medical Education Committee), and is a member of our FM Program Evaluation Committee. The Chief will also assist in review of policies and procedures, preparation for inspections and internal reviews, and organizing resident participation in the interview process.

**Associate Chief Resident:** The Associate Chief Resident is a second year resident who is also peer selected in the second half of the academic year of their PGY1 or PGY2 year. This person assists the chief resident with their duties, attends meetings in the event the Chief is unavailable. The Associate Chief also attends an FM chief resident's conference at UW in the spring to help develop professional leadership skills and network with other resident leaders in the region.

*\*Refer to the Chief Resident and Associate Chief Resident Job Descriptions, and Chief Resident Timeline documents for more details about specific duties and election timeline.*

**OB Lead Resident:** The OB lead resident is a second or third year who has a passion and interest in OB care, assists the OB Faculty Liaison with their duties, helps to maintain the Epic Residency OB shared list and the OB patient spreadsheet in the clinic P drive in conjunction with the faculty OB lead, and attends the monthly Family Birth Center (FBC) workgroup when able.

## Students

It is expected that all residents actively engage in teaching, leadership, and mentorship roles for students of all disciplines as appropriate in each clinical setting.

**PNWU Medical Students:** SRH is a core site for Pacific Northwest University of Health Sciences College of Osteopathic Medicine (PNWU) for training of 3<sup>rd</sup> and 4<sup>th</sup> year medical students. The FM residency clinic hosts 3rd year students for FM and Osteopathic Medicine rotations and 4th year students for audition rotations.

*\*Refer to the annual PNWU Student Roster for 3rd and 4th year students and pictures.*

**UW Medical Students:** The FM residency clinic hosts 3rd year University of Washington (UW) students for FM rotations, and 4th year students for audition rotations.

**WSU Pharmacy Students:** SRH is a regional core site for WSU 4th year pharmacy students. The FM residency clinic intermittently hosts pharmacy students when they are on Outpatient Clinic rotations.

**Auditioning FM Medical Students:** The FM residency hosts auditioning medical students during interview season. These rotations are usually designed to be 2 week rotations in our FM Residency clinic. Additional opportunities may be available to work with the inpatient FM team depending on the time of the rotation.

## Section 3— FM Program Introduction

### Mission

The mission of the SRH Family Medicine Residency is to improve health access and health status for rural, minority and underserved persons living in Washington by developing training programs for health professionals in our setting that serve those populations. Accordingly, our program involves a mutually beneficial educational relationship between regional hospitals, clinics, and local medical schools.

### Program Overview

We train DO and MD residents with the hopes that many will stay and serve the Skagit community and greater area after graduation. We value customization as much as possible of an individual's training to meet their current needs and their future practice needs. We hope to promote the education of kind, caring, compassionate, patient centered, evidence based clinicians. We enjoy practicing alongside many of our graduates as colleagues, faculty, and mentors in the community.

Our goal is to produce professional, board certified family physicians capable of providing competent, independent, and professional health care service. In addition we train physicians in the full breadth of primary care to serve rural and underserved communities, as well as promote independent learning skills to provide basic health care for all people.

*\*Please read the ACGME FM Program Requirements for a great description of what's being asked of us in each area or competency for consideration for FM training. Refer to link in New Innovations.*

## Section 4— FM Curriculum

---

### Continuity of Care

Continuity of care is the primary mechanism of experiential learning in FM residency training. Each resident is expected to provide continuity care as the PCP (Primary Care Physician) of their own patient panel and will be assigned a set number of half day clinic sessions at the “FMP” (“*Family Medicine Practice*– this is ACGME’s language) on a regular/ weekly basis during all rotational experiences throughout the residency. Generally PGY1s will have at least 2 half day clinics per week, PGY2s will have 3-4, and PGY3s will have 4-5. These numbers may change on some rotations.

Residents will provide continuity care in a variety of locations besides the residency clinic including following patients through hospital admissions, providing home visits, care at long term and skilled nursing facilities, and hospice care. Residents will manage and help patients navigate the transitions of care associated with each phase. As the PCP, residents are expected to coordinate their patients’ care with all specialists, including communication and advocacy, and managing a patient care team.

*\*ACGME FM Requirements were updated in July 2023 and all residents who are incoming in July 2023 will fall under the new requirements. A transition period is recognized as necessary for residents who are PGY2-3.*

### Rotations

Required (core) rotations will be scheduled automatically by the residency coordinator. Rotation requests for electives, medical selectives, and surgical selectives should be submitted by March for the following academic year. We require at least 3 months’ notice to rearrange rotations, and cannot guarantee each request but we will do our best to accommodate.

Our goal is to keep all rotations within SRH if available. If not available, a rotation may be possible at an outside site. This will take much longer to arrange, since new contracts and affiliations may be necessary, and will need at least 6 months’ notice for coordination. Outside electives may be allowed in the PGY2-3 years, no more than one away rotation per year. We are currently working on some options for possible international rotations, and request a year in advance to coordinate these.

Our year is divided into 13 four-week blocks, divided further into two-week subblocks (eg, 1a, 1b, 2a, etc). PGY1, PGY2 and PGY3 residents begin each block on a Monday and end their blocks on Sunday. Each resident is assigned to a specific service or rotation for each block. The resident is responsible to the attending physicians and any senior residents or fellows on that service or rotation, and for adhering to all policies and procedures of the rotation site. It is the resident’s responsibility to confirm with the supervisor when the workday begins and to be ready for work by that time each day. Information can be found on the first page of each rotation goals and objectives document in New Innovations, and should be verified with the attending.

Required Rotations listed below may be shifted from one year to another with program director approval, or as necessary by the program, but must be completed by the end of residency.

<b>PGY1 REQUIRED ROTATIONS</b>	<b>PGY2 REQUIRED ROTATIONS</b>	<b>PGY3 REQUIRED ROTATIONS</b>
<i>Inpatient Adult Medicine - 16 weeks</i> <i>Family Medicine Practice - 4 weeks</i> <i>Inpatient Obstetrics - 8 weeks</i> <i>Outpatient Pediatrics - 4 weeks</i> <i>POCUS - 2 weeks</i> <i>Outpatient Gynecology - 2 weeks</i> <i>Intro to Family Medicine - 2 weeks</i> <i>Cardiology Outpatient - 2 weeks</i> <i>Orthopedics - 2 weeks</i> <i>Addiction Medicine - 2 weeks</i> <i>Urgent Care - 2 weeks</i> <i>Geriatrics - 2 weeks</i> <i>Palliative Care - 2 weeks</i> <i>Emergency Medicine - 2 weeks</i> <i>Electives - 6 weeks</i>	<i>Inpatient Adult Medicine - 5 weeks</i> <i>Family Medicine Practice - 4 weeks</i> <i>SCH Inpatient Pediatrics - 4 weeks</i> <i>SRH Inpatient Pediatrics - 4 weeks</i> <i>Outpatient Pediatrics - 2 weeks</i> <i>Outpatient Gynecology - 2 weeks</i> <i>General Surgery - 2 weeks</i> <i>Nephrology - 2 weeks</i> <i>Sports Medicine - 2 weeks</i> <i>Addiction Medicine - 2 weeks</i> <i>Urgent Care - 2 weeks</i> <i>Interventional Pain - 2 weeks</i> <i>Psychiatry/Behavioral Health - 2 weeks</i> <i>Emergency Medicine - 2 weeks</i> <i>Surgical Selectives - 2 weeks</i> <i>Electives - 10 weeks</i>	<i>Inpatient Adult Medicine - 5 weeks</i> <i>Family Medicine Practice - 4 weeks</i> <i>SCH Emergency Pediatrics - 4 weeks</i> <i>Outpatient Pediatrics - 2 weeks</i> <i>POCUS - 2 weeks</i> <i>Infectious Diseases - 2 weeks</i> <i>Rheumatology - 2 weeks</i> <i>Cardiology Inpatient - 2 weeks</i> <i>Endocrinology - 2 weeks</i> <i>Medical Selectives - 4 weeks</i> <i>Surgical Selectives 6 Weeks</i> <i>Electives - 8 weeks</i>

*\*Please let the residency coordinator and FM faculty lead know if any information is out of date, so the document can be revised before the next rotation begins.*

*\*Refer to the ACGME Program Requirements for FM [Common Program Requirements \(acgme.org\)](http://www.acgme.org) as well as SRH FM Rotation Goals and Objectives in New Innovations. Some rotations also have their own documents and guidelines- for example Inpatient Internal Medicine, Inpatient Pediatrics- both SRH and SCH, ENT, FMP.*

## **Osteopathic Recognition (OR)**

All FM residents will be taught skills in OMT (osteopathic manipulative treatment) and about the osteopathic philosophy as it applies to patient care. We have a very strong osteopathic faculty to teach and model osteopathic care in a variety of patient care settings. Osteopathic skills workshops and journal clubs will be integrated into our curriculum for all residents.

For residents interested in advanced training, there are elective rotations available as well as specialty conferences for many different types of osteopathic treatment. There are also local and regional workshops

available for MDs who are seeking extra knowledge about osteopathic treatment. DO residents will automatically be enrolled in Osteopathic Recognition, and MD residents can apply for it if they choose.

*\*Refer to the Osteopathic Toolkit in the WWAMI Network Digital Resource Library (NDRL) for more information and resources. Link is in New Innovations under Reference Materials.*

## Didactics and Workshops

In addition to the experiential learning of continuity patient care and patient care on rotations, residents' knowledge and skills will be augmented with a schedule of didactic activities. Residents are expected to attend, and their time is protected for these activities. All faculty/ attendings are aware that this is protected time, and it's OK to remind them. Didactic activities may include lectures, conferences, courses, labs, asynchronous learning, simulations, workshops, drills, case discussions, grand rounds, journal clubs, and education in critical appraisal of med

ical evidence.

### *Didactics Weekly Schedule:*

Presentations usually occur in the GME didactics rooms. The schedule is located in New Innovations, and attendance must be recorded in New Innovations. Specific topics and details for the week can also be found on the white board in the hall by the coordinators' office. Didactics presentations are for both residents and medical students. Some will be with IM residents and some will be separate.

Morning Report is required for all residents (FM and IM) on inpatient internal medicine and ICU rotations, or per your rotation attending for some inpatient medicine specialties.

Noon daily didactics and monthly Skills Workshops are required for all residents unless noted. (Residents on Night Float & Seattle Children's) Didactics may be attended virtually via the provided Zoom links in New Innovations, when appropriate/ available. There are links for FM and IM didactics.

	Monday	Tuesday	Wednesday	Thursday	Friday
AM	7-7:30 Morning Report	7-7:30 Morning Report	7-7:30 Morning Report	7-7:30 Morning Report	7-7:30 Morning Report 730-830 Virginia Mason Grand Rounds (Optional)
PM	12:15-1:15 Didactics	12:15-1:15 Didactics	12:15-1:15 Didactics	12:15-1:15 Didactics 1:15-5 Procedure Skills Workshops- 2nd week of every block	12:15-1:15 Didactics

Our current outline for topics areas and speakers:

<b>Outline for Didactics</b>			*No students/by calendar month for Wed only		
------------------------------	--	--	---	--	--

Block	Monday	Tuesday	Wednesday	Thursday	Friday
<b>Wk 1</b>	Abresch - Wellbeing or Psych (alternating)	Pulmonology Lecture	Palliative/ Hospice	Kunz OB or Peds Lecture (alternating)	FM Resident Only Meeting/ Quarterly FM/IM meeting - Led by Chiefs
<b>Wk 2</b>	FM Journal Club (FPIN & OR) - FMP Resident Led	FM Program Meeting - PD/Chief led	MMI Presentation	Skills Workshop Afternoon with Topic Lecture	High Value Care or DEI Topic or DIO Meeting (alternating)
<b>Wk 3</b>	Abresch Gyn/Psych/ OMT Lecture	IM/FM Combined Specialty Lecture	Ginoza OMT Lecture	IM/FM Combined Specialty Lecture	Cardiology Lecture
<b>Wk 4</b>	FM Guidelines (FMP Resident)	Peds Hospitalist Lectures	IM/FM Combined Specialty Lecture Kunz OB Skill lab with OB resident	Mock Code/FM Board Review (outpt Resident led)	Finishing Friday - FM Coordinator led

## Scholarly Activity

All residents are required to complete at least one scholarly activity “FPIN Help Desk Answer” to be published in the Journal of Evidence-Based Medicine. This is generally done as a group intern year, but an “FPIN GEM” article will also suffice to ensure that all residents know how to search, interpret, and apply medical articles. We also present this article on Scholarship Day in Spring of PGY2 and to their FM peers during didactics after acceptance for publication.

Additionally, there is a QI project required with a final poster presentation. This will follow a PDSA cycle and often is tied to a clinic healthcare metric or program advancement to meet acgme milestones. Our goal is for you to have a project, proposal, and timeline completed by the end of PGY1, with study/actions in PGY2 with presentation and handoff by PGY3. We also present these on Scholarship Day in Spring of PGY 2 or 3 and to their FM peers during didactics. Publication/regional/national presentation is encouraged, but not required. If you present at a regional or national conference, we will prioritize giving the resident time to attend, per program director discretion.

All residents are required to present in didactics for Journal club using the FPIN PURLS Journal Club format and an accompanying Osteopathic Article (this can be OMT, anatomy, or a related biopsychosocial topic). Additionally, OR residents are encouraged to present at the monthly 30 mins WWAMI Osteopathic Grand Rounds, and are required to teach their favorite techniques and to assist with didactics (learning, teaching, practicing or table training throughout all years).

Other recommended scholarly activity includes: presentation at regional, state, or national meeting, grand rounds, publications of articles, book chapters, abstracts, or case reports in peer reviewed journals, publication of peer-reviewed performance improvement or education research, obtaining peer-reviewed funding, presentation of peer-reviewed abstracts at regional, state, or national specialty meeting, or leadership in a regional, state, or national osteopathic-related organization.

Our scholarly didactics topics will include monthly Journal Clubs, the High Value Care curriculum by the American College of Physicians, scholarly-works-in-progress meetings, and a Help Desk Answer (HDA) writing workshop.

SRH is a member of the Washington Primary Care Research Network (WPRN), and the residency clinics participate in various clinical research projects.

## Independent Study

Independent study is a vitally important and often poorly emphasized area of resident training and preparation. Residents are expected to maintain a program of independent self-study sufficient to acquire the knowledge and skills necessary for achieving success in their clinical experiences and on their required examinations. Here are some suggestions:

**Relevant Reading:** At least 20 minutes a night on a topic relevant to a case seen that day, or in preparation for the next. (Up to Date, Dynamed, Clinical Inquiries)

**Rotation Specific Review:** "NEJM Resident Rotation" has sections relevant to each core rotation in Family Medicine.

**Board Review/ Practice Questions:** Integrate True Learn, UWorld, or Amboss questions into weekly studying and longitudinal planning.

### Family Medicine References:

American Family Physician: FPIN's Help Desk Answers, Evidence Based Medicine  
 AFP Journal: Pertinent board relevant articles (there is also a podcast)  
 Essential Evidence Plus: Daily POEMS (emailed or podcast)  
 Smart Briefs: Family Medicine, Nutrition  
 NEJM: Journal Watch

### Osteopathic References:

Journal of Osteopathic Medicine (formerly JAOA)  
 The American Academy of Osteopathy (AAOJ) Journal  
 Osteopathic Family Practice (OFF) Journal  
 International Journal of Osteopathic Medicine (IJOM)  
 5 minute OMM Consult; Channell & Mason (2009)

*\*Refer to the Osteopathic Toolkit in the WWAMI Network Digital Resource Library (NDRL) for more resources. Link found in New Innovations under Reference Materials.*

## **Leadership and Teaching**

All residents are mentors and teachers to junior residents, medical students, pharmacy students, and other members of the interdisciplinary team. Duties should be clearly delineated by the senior resident with the attending at the beginning of the rotation, and shared with the team.

Beyond the specific duties of a rotation, each resident is expected to assist peers and juniors with tasks, assignments, and duties related to residency, clinic, hospital, being on call, on rotation, wellbeing, career goals, etc. Listen and offer tips, tricks, resources, and wisdom as you can. We all come from diverse backgrounds and have learned a lot on our journeys in medicine (and life) thus far, and have a lot to share with one another.

Teaching and leadership skills are expected in the medical community, and are integrated into most ACGME milestones.

## **SRH Hospital and GME Committees**

Residents are encouraged to be members of committees/ to participate in leadership roles within our organization as well as our profession locally, regionally, and nationally.

GMEC (GME Committee), Wellness Subcommittee, DEI (Diversity Equity Inclusion) Subcommittee

GMEC: CLER (Clinical Learning Environment Review), IRAC (Institutional Resident Advisory Committee)

SRH P&T (Pharmaceuticals & Therapeutics), Antimicrobial Stewardship, Ethics, DEI (Institution)

SRH Employee Engagement, Patient Engagement, IRB (Institutional Review Board)

SRH PEC (Professional Enhancement Committee- formerly called "Peer Review")

SRH FBC (Family Birth Center) Workgroup, Family Planning (Elective Abortion)

## **Section 5— Supervision and Evaluation**

### **ACGME Core Competencies**

Professionalism, Patient Care and Procedural Skills, Medical Knowledge, Practice-based Learning and Improvement, Interpersonal and Communication Skills, Systems-based Practice

As a program with Osteopathic Recognition, osteopathic principles and practices are woven throughout each competency and area of our program.

*\*Refer to the ACGME Program Requirements for details:*

[Family Medicine \(acgme.org\)](https://www.acgme.org/family-medicine)

[Osteopathic Recognition Requirements \(acgme.org\)](https://www.acgme.org/osteopathic-recognition-requirements)

## FM and OR Milestones

Milestones are designed for programs to use in semi-annual review of resident performance and reporting to the ACGME. Milestones are knowledge, skills, attitudes, and other attributes for each of the ACGME competencies, organized in a developmental framework from less to more advanced. They are descriptors and targets for resident performance as a resident moves from entry into residency through graduation.

Milestones are arranged into levels. Selection implies that the resident substantially demonstrates the milestones in that level, as well as those in lower levels. A general interpretation of the levels is below:

- 1: Expected of a resident who has had some education in family medicine
- 2: Advancing and demonstrating additional milestones
- 3: Continues to advance and demonstrate additional milestones; consistently demonstrates the majority of milestones targeted for residency
- 4: Substantially demonstrates the milestones targeted for residency- graduation target
- 5: Advanced beyond performance targets set for residency and demonstrating “aspirational” goals which might describe the performance of someone who has been in practice for several years- it is expected that only a few exceptional residents will reach this level

*\*Refer to the ACGME Milestones documents for full details:*

[familymedicinemilestones.pdf \(acgme.org\)](https://www.acgme.org/familymedicinemilestones.pdf)

[osteopathicrecognitionmilestones.pdf \(acgme.org\)](https://www.acgme.org/osteopathicrecognitionmilestones.pdf)

## Supervision

Board-certified physicians in each specialty will supervise all patient care. Schedules are structured to provide residents with continuous supervision and consultation available. Nurse Practitioners, Physician Assistants, or other similar providers may supervise residents as long as there is also a board-certified physician involved in the oversight.

From the GME policy: Resident education is progressively graduated in both experience and responsibility with primary attention to the benefit, and safety of the patient. Development of mature clinical judgment requires that each resident be involved in the decision-making process. The conditional independence of the resident should be determined by each program and individualized to be commensurate with the clinical circumstances and ability of the resident.

In such an environment, each physician participating in the clinical training environment will have specific and defined roles and responsibilities:

### Residents

1. Are supervised by an attending physician or other appropriate provider;
2. Are responsible for being aware of their limitations, roles, and responsibilities within the course of patient clinical care;
3. Must know the limits of their scope of authority, and the circumstances under which the resident is permitted to act with conditional independence;
4. Are supervised in a manner consistent with national standards of supervision as defined by the ACGME;

5. Are provided progressive authority and responsibility, conditional independence, and, when appropriate, a supervisory role in patient care as assigned by the program director and faculty members;
6. Are expected to communicate effectively with attending physicians and other members of the health care team;
7. Are required to inform patients of their respective role in each patient's care.

Communication between residents and the attending physician will occur at the time patient care decisions are being made. Prior to clinical care decisions, the attending physician will facilitate communication regarding care decisions. Examples include, but are not limited to, the following:

1. Admission and discharge of a patient;
2. Decision-making applied to high-risk or complex procedures and/or interventions, to include surgeries, use of moderate sedation, and high risk or complex diagnostic procedures;
3. An important change in status occurs and/or when a patient is transferred from one service to another and/or from one level of service to another (e.g. admission of a patient from the clinic, transfer of a patient to intensive care unit, etc.)
4. When a patient's condition is unexpectedly deteriorating, or when a patient is not improving clinically in an expected fashion or time course; and
5. When disclosure of a significant adverse event is necessary.

Clinical consultation ranges from verbal advice to interdisciplinary concurrent care. The documentation will reflect the complexity of the clinical question and degree of consultant involvement.

In an emergency situation to preserve life or prevent serious impairment to health, residents shall be permitted to implement life support services. Notification must be made to the supervising physicians as soon as possible. The responsibilities of the attending physician to the patient and to the residents are not changed by these circumstances.

**Supervision in the outpatient setting:**

All PGY1s must find a preceptor to discuss every patient while the patient is in the office, and the preceptor must see each patient in person at least until 6 months of residency has been completed satisfactorily. Any virtual or telephone encounters performed in the first 6 months of training must have a preceptor directly on the call observing and participating.

All residents must have a preceptor present when performing procedures. BSQs will help track competency of skills, and even when a resident is deemed "independent", a preceptor must be present for billing purposes.

All residents must have a preceptor see infants under 1 year of age and all OB patients.

**Procedures:**

All procedures including OMT will be directly supervised until the resident achieves independence. We use Basic Skills Qualification (BSQ's) with step-by-step guidelines to measure and record residents' progress to independence. (Direct supervision may be required for billing purposes, even after a resident has achieved "independence", since all billing is in the name of the supervising physician.)

*\*Refer to the GME/ FM policy for full details: [Supervision of Graduate Medical Education Residents](#)*

**Handoff Process:**

When possible, residents and faculty will identify a quiet area to give report that is conducive to transferring information with few interruptions.

Off-going providers will have at hand any supporting documentation or tools used to convey information and immediate access to the patient's record.

All communication and transfers of information will be provided in a manner consistent with protecting patient confidentiality. Residents will use the modified I-PASS format, and training will be provided for this.

Providers will afford each other the opportunity to ask or answer questions and read or repeat back information as needed. If the contact is not made directly (face-to-face or by telephone), the provider must provide documentation of name and contact information (extension, cell number, or email address, etc.) to provide opportunity for follow up calls or inquiries.

The patient will be informed of any transfer of care or responsibility, when possible.

*\*Refer to the GME/ FM policy for full details: [Transitions of Care](#)*

## Examinations

**In-training exams:** Every year the ACOFP in-service examination (ISE) is administered in October (2<sup>nd</sup> week). All DO residents are required to complete it. MD residents interested in Osteopathic Recognition may elect to take the ACOFP Cortex examination, which covers OMM/OMT knowledge, but they are not required to do so.

The AAFP in-training examination (ITE) is administered in October (4th week) and all residents are required to complete it.

**COMLEX 3 or USMLE Step 3:** All residents must pass Step 3 prior to beginning the PGY3 year per ACGME. Failure to do so means a contract for PGY3 will not be offered and the resident may be dismissed from the program. (Contracts are prepared 120 days prior to the next academic year.)

**FM Board Certification Exams:** Residents are required to take ABFM and/or AOBFP exams in the spring of their PGY3 year, or within 6 months of anticipated graduation.

## Evaluation and Promotion

Residents will be expected to evaluate their rotations or experiences and faculty, as well as be evaluated by faculty at least every 4 weeks at the end of each rotation. We suggest that residents and faculty give verbal feedback every day or every half day, since timely and specific feedback is the most useful. All written evaluation will be in New Innovations. "Field Notes" are a way to give brief feedback in the moment. End of rotation evaluations will be sent to all parties in the 4th week of the rotation. Resident comments go directly to the advisor and program director, and are given anonymously to the rotation attendings at the end of each academic year at a minimum. If there is a substantial issue recorded in a resident evaluation of an attending or a rotation, then advisors and the program director will address it in a timely manner.

360 degree evaluation is integrated through every part of the training: residents and faculty will be asked to evaluate each other and perform self-evaluation, and feedback will be obtained from patients and staff.

All residents are assigned an advisor who will perform quarterly or triennial evaluations. These will include patient care shadowing, review of all evaluations in NI, and review of Milestones. Residents are reviewed by the Clinical Competency Committee (CCC- made up of core faculty) at least twice a year. The CCC

determines each residents' progression along the Milestones and toward independent practice. The program director and coordinator must report all residents' Milestones to ACGME twice a year.

From ACGME IV.A.: The trajectory to autonomous practice is documented by Milestones evaluation. The Milestones detail the progress of a resident in attaining skill in each competency domain. They are developed by each specialty group and allow evaluation based on observable behaviors. Milestones are considered formative and should be used to identify learning needs. This may lead to focused or general curricular revision in any given program or to individualized learning plans for any specific resident.

The Program Evaluation Committee (PEC) is made of core faculty, program coordinator, and chief residents and will evaluate the program as a whole. Reports will be made to the residents and faculty, and at least once a year, will prepare an Annual Program Evaluation (APE) with an Action Plan which will be reviewed and updated regularly. We consider the APE a living document to be reviewed and worked on throughout the year as we strive for continuous improvement.

*\*Refer to the GME/ FM Evaluation and Promotion of Residents policies for full details: [Evaluation, Promotion of Residents](#)*

## Section 6— Program Logistics

### Call

---

All residents take after-hours phone calls for FM Residency Clinic patients while on outpatient rotations. This includes nights, weekends, and holidays. The on call resident may get called during didactics occasionally when there isn't an RN to cover in the clinic for lunchtime. The core faculty will cover calls during skills workshops, as needed for clinic meetings, and also help cover lunchtime needs.

PGY1s will start taking call in October at the earliest, or after 3 months of experience. The chief/ co-chief/ associate chief resident makes the schedule to ensure coverage and fair distribution. There is a core faculty backup on call for any questions you have. The schedule is in New Innovations and the SRH on call list (found on the intranet under the Provider tab). Changes to the schedule need to be communicated asap with the chief residents and the coordinator in order to notify the answering service.

All residents must have 1 day off in 7 (averaged over 4 weeks) without any assignments including call from home. Core faculty will take call when there aren't enough residents on outpatient rotations and during resident retreats.

### Communication

All residents receive an SRH email account, and this will be the primary means of communication for program information. Residents are required to check their email daily and respond appropriately in a timely manner. Computers with internet access are available in the library, on all floors of the hospital, and in the residency clinic.

Other communication to residents could be via written memorandum, telephone, text, AMS paging, and Viber. No patient-identifying information will be transmitted via text due to HIPPA. Epic has a secure chat for patient care communication (Haiku) which is also available in a smart phone app. Residents are currently expected to be available via AMS paging during the work day and when on call for immediate responses.

All residents are required to check their Epic In Basket daily at minimum, and respond appropriately to all staff and patient needs to ensure timely communication, patient safety, and quality of care. When on vacation, residents will ask another resident on their clinic team to cover their in basket and update epic with an out of

office message naming the person who's covering. This will also be communicated to the chief residents for sharing with all staff.

## **Educational Stipend**

---

Residents receive an annual stipend for educational materials which is outlined in the resident contract. This stipend must be used for educational materials and cannot be used for equipment. Residents typically use this to pay for Step/ Level 3 in PGY1, a review course, question bank, or practice tests in PGY2, and board examination fees in PGY3.

*\*Please see residency coordinator for reimbursement forms to access funds from your annual stipend or to ask for use of the GME Credit Card to prepay for something.*

## **EHR Medical Record Completion**

---

Residents are expected to complete medical records at the time of service. Inpatient notes must be completed right after rounding and before leaving for afternoon clinics. Clinic notes should be completed before leaving for the day. In some instances, clinic notes can be completed that evening from home- but caution should be used since those hours would still be logged as work hours- and when working from home it is sometimes complicated due to multitasking, interruptions, home environment distractions, etc. (Per SRH Policy- all notes must be completed and signed within 24 hrs. And then preceptors must sign/ attest within 48 hrs.)

## **Meal Stipend**

---

Residents receive a meal stipend for personal use only during work hours at SRH and SCH. Meal stipends are not to buy food for medical students, friends, or family members. Some items are also available in the GME break room for those working nights or weekend times when the cafeteria is closed.

*\*Please see residency coordinator or administrator for any special needs.*

## **Moonlighting**

Any professional clinical activity ("moonlighting") performed outside of an official residency program will only be conducted with the permission of the DIO and Program Director.

Residents are not required to engage in moonlighting. PGY1 trainees are prohibited from moonlighting, per ACGME. Residents may only be permitted to moonlight provided that such employment does not interfere with their educational program and it must not represent a conflict of interest. The resident must be in good standing within the residency program, and all residency requirements, institutional requirements, logs, evaluations, and medical records must be up-to-date.

An application by the resident must be approved or disapproved by the DIO and Program Director and be filed in the resident's file. Failure to report and receive approval by the program may be grounds for dismissal. If moonlighting is permitted, hours shall be inclusive of the 80 hour per week maximum work limit and must be reported to the Program Director and monitored by the GMEC. All residents engaged in moonlighting must

have a separate, permanent medical license, and must have separate malpractice insurance coverage for their employment duties.

*\*Refer to the GME Resident Moonlighting Policy for full policy details and application for moonlighting: [Resident Moonlighting](#)*

## **New Innovations Record-Keeping**

It is required that you log your duty hours and log all procedures performed. It is recommended that you log all procedures right after you perform them. Documentation must include the procedure name (be as specific as possible- and there is a comment box), date performed, role in the procedure (performed, assisted, etc.), supervising physician, and 2 separate patient identifiers like MRN and birthdate (no patient names)- so you could find the record again if needed.

The residency coordinator can add procedures or supervising physicians to the list of choices, if the item needed is missing.

The purpose of logging all procedures is to document training and competence in procedural skills- and also to create a list to provide to future employers for any procedures you seek privileges for. This includes hospital medical staff offices for inpatient procedures and outpatient office credentialing, long term care facilities, etc. You will be required to show proof of competence in any procedure you want to do after graduation. If you don't log the procedures, there will be no record to share with your future employer.

## **Paid Time Off**

Each resident will have 20 days of paid time off (PTO) per year. Residents must have all time-off requests approved by the Program Director. They must be requested in writing through the coordinator at least 3 months in advance. Paid Time Off includes vacation, personal leave, elective educational conferences, and any other requested time off work. Extensive sick leave will be handled per Program Director discretion with attention to rotation requirements and milestones achieved.

No PTO will be granted on most inpatient rotations or the first block of intern year. No more than 1 week will be granted away in any 4 week rotation in order to preserve the integrity of the educational experience.

Residents are encouraged to take care of their own physical and mental health. If time is needed for medical or appointments please notify the program coordinator. While we understand some issues are urgent, we encourage residents to try to schedule non-urgent appointments when they are not scheduled in their continuity clinic or on an inpatient team to minimize patient care disruptions.

*\*Refer to the GME Paid Time Off Policy and the Effects of Leave of Absence for more details: [Paid Time Off Utilization, Effects of Leave of Absence](#)*

## **Parking**

Residents/ employees are not to park in patient parking lots. There are maps that show designated staff and physician parking lots, and parking is found on side streets around campus as well. SRH security is tracking this and will ticket or tow your car if parked inappropriately. Please be courteous to our patients.

Note that security is available to walk you out to your car if requested in the darkness of a winter evening, for example.

## Sick/ Emergency/ Who to notify?

If you're sick, we want you to stay home and get well. If you have an emergency- let us know! Communication helps everyone navigate things more successfully. Who you have to call depends on your work assignment(s) for the day.

Always **text** your residency coordinator and program director, as well as your senior resident and rotation attending for that day. Please make sure you receive confirmation that your message has been received. You'll need to notify this same group each day you'll be out. Emails are not timely enough for this sort of notification.

Once you are back to work, then we'll figure out how to account for your time off. (Can you make up the time, use sick days, do you have to use PTO, will it extend your training year, etc.)

## Technology How To's

### Getting to Intranet from home:

- Goto <https://citrix.skagitregionalhealth.org/vpn/index.html>
- You will need to have citrix to get here, it will help you install if you don't have it
- Log in with Windows username and Password
- Click SRH Intranet (you can use internet explorer or chrome [SRH Intranet – Chrome])

### Getting to Epic at home... (make sure you have Citrix as above)

- get VPN <https://vpn.skagitregionalhealth.org/>
- Install Cisco Anytime Connect (above link will guide you)
- Must connect to VPN First
- open this Link: <http://epic-portal.et1005.epichosted.com/>
- Click epic Icon, log in.
- When done, close Epic and then LOG OFF or CLOSE CISCO ANYTIME CONNECT (You don't want your private browsing history sent to Skagit!)

### Email:

<http://mail.skagitvalleyhospital.org/>

### Get your New-Innovations onto Outlook:

- Log into New Innovations
- Go to Scheduled > My Schedule
- In upper right, there is a blue link (above Saturday)
- Copy the iCalendar Subscription Link
- Go to your Email (Link above)
- Click Calendar
- Right click on "My Calendars" on the right (below the mini calendar)
- Select OPEN CALENDAR
- Paste Link from New Innovations into "Internet Calendar" Box
- Click OPEN

## Setting up Email on iPhone

- Go to Settings
- Passwords and Accounts
- Add Account
- Microsoft Exchange
- Enter email ( mine is: dhayes@skagitregionalhealth.org your should be first initial, last name @skagitregionalhealth.org or similar)
- In Description name what you want... mine is Skagit Email
- Click “Configure Manually”
- Enter Password
- For Server: mail.skagitvalleyhospital.org
- Domain: ahs
- Username: (what you use to log into windows!)
- Password: your windows password
- Say done

If you sync mail and Calendar you should now have New Innovations on your iphone calendar.

## Setting up UpToDate:

- Go to <https://citrix.skagitregionalhealth.org/vpn/index.html> and go to Intranet
- Go to UpToDate
- When you get here, you will see “Skagit Valley Hospital” In the upper right corner
- Click Register, create account, this will affiliate you with Skagit and let you sign in on your phone / ipad / home computer

## Setting up Access Medicine:

- From intranet... go to <https://accessmedicine.mhmedical.com/>
- You should see “Skagit Regional Health” In upper right corner, Click this and select “sign in or create a free myaccess profile”
- This will let you create an affiliated account with Skagit

## Setting up Johns Hopkins Antibiotic Guide

- From intranet browser... go to [https://www.unboundmedicine.com/ucentral/index/Johns\\_Hopkins\\_ABX\\_Guide/Diagnosis](https://www.unboundmedicine.com/ucentral/index/Johns_Hopkins_ABX_Guide/Diagnosis)
- You will see Skagit Regional Health in the Right upper corner
- Click Sign In
- A box will pop up, click register
- Register for an account, you will then be able to get the app (“uCentral”) on your phone / ipad or access on your home computer.

## Dragon on your phone:

1. Download PowerMic Mobile from app store 2. Click this link: <http://powermicmobile.nuance.com/PowerMicMobile/253cfbd4-a448-4db0-ad88-7e99b6e3c98f/index.html>
3. profile url: pms.nuancehdp.com
4. log-in with user name
5. Dragon has to be open and you select PowerMic Mobile as your microphone on the loading screen.

## Doximity - app for doctors only

1. Free fax number
2. Free dialer, can make it seem like you're calling from the clinic

## Work Hours

---

Residents must adhere to the policies regarding work hours. The training schedules will be closely monitored to assure compliance with ACGME work hour requirements.

**Maximum Hours of Clinical and Educational Work per Week:** Clinical and educational work hours must be limited to no more than 80 hours per week, averaged over a four-week period, inclusive of all in-house clinical and educational activities, clinical work done from home, and all moonlighting.

**Mandatory Time Free of Clinical Work and Education:** Residents must be scheduled for a minimum of 1 day (24 hours) in 7 free of clinical work and required education- averaged over 4 weeks. At-home call cannot be assigned on these free days.

**Maximum Clinical Work and Education Period Length:** Clinical and educational work periods for residents must not exceed 24 hours of continuous scheduled clinical assignments. Up to 4 hours of additional time may be used for activities related to patient safety, such as providing effective transitions of care, and/or resident education. Additional patient care responsibilities must not be assigned to a resident during this time.

**Clinical and Educational Work Hour Exceptions:** In rare circumstances, after handing off all other responsibilities, a resident may elect to remain or return to the clinical site in the following circumstances: To continue to provide care to an OB continuity patient, a single severely ill or unstable patient; humanistic attention to the needs of a patient or family; or to attend unique educational events. These additional hours of care or education will be counted toward the 80-hour weekly limit.

**Duty Hour Violations:** If a duty hour violation occurs, please specify the reason for the violation when logging your duty hours in New Innovations. Notify your attending of the occurrence and adjust your schedule as needed. Contact the program coordinator, your advisor, or the program director if you have questions about what your options are to avoid duty hour violations in the future.

*\*Refer to the ACGME resident work hours requirements and the SRH GME policy for the full details:*

[Clinical Experience and Education- The Learning Environment](#)

## Section 7— FM Residency Clinic

### Clinic Hours

---

Clinic hours are Monday-Friday from 7:30am-5:30pm. Patient appointments are currently 8am-5pm. No patient appointments are scheduled from 12:00-1:30 to allow residents to attend required didactics from 12:15-1:15 and staff to have lunch from 12-1.

If you have a patient here past 5:30, you will need to open the front door with a key for patients to exit, or escort them out the side or back door. The key for the main door is at the front desk. Please locate this when you start. Please be respectful of staff at the end of the day. If you are running behind, the MA will check in with you to see if you need them to stay. If there is nothing left for them to do, they will leave. Same with the MRs.

Note that patient care hours may be extended this year to allow for more faculty and providers and more patient access.

## Staffing and Roles

#	Title	Role
5	Medical Assistant-Certified (MA-C) Full Time/shifts vary	Work 1:1 with a provider. Rooming, med/vaccine administration, procedure set-up/clean-up, ECGs, process paperwork/faxes, work Inbasket, all patient care w/in scope of practice
1	RN Triage Nurse Full Time; 8-5	Patient triage (phone & in person), Inbasket, RN Refill Protocol, Nurse Only visits, clinical resource for MAs.
3	Medical Receptionist (MR) Full Time/shifts vary	Run front office, check patients in, process referrals, answer phones, process paperwork/faxes, schedule/cancel appointments
1	Patient Navigator Part Time	Interface with Ideal Options to assist with addiction resources for patients
1	Practice Manager Full Time- shared w IM Res	Run clinic operations, including finance, staffing, facilities, issues, patient complaints, issues, etc.
1	RN Clinical Supervisor Full Time- shared w IM Res	Assist with anything clinical, educates staff/providers, works closely with MA and RN in providing safe, quality patient care, patient complaints, issues, etc.

Many employees are patients at our clinic, including some of our own staff. When medical care is being performed on a staff member, they cease being an employee and should be treated as any other patient. Please let the Practice Manager or RN Clinic Supervisor know if this becomes problematic.

Note one change coming soon is a centralization of referrals staff, so you'll be updated as we know more.

## Clinic Etiquette

Parking in the clinic parking lot is reserved for our patients.

Eating is not allowed in patient care areas. This includes all provider workstations unless in an office. Drinks are allowed but must have a lid.

The break room is available to all. Please be responsible and clean up after yourself. Clinic budget includes coffee, tea, sugar, utensils. Creamers, candy, etc are bought by staff or providers and generally shared with all. Put your name on any item in the fridge or on the table if it is not intended to be shared with others.

Secure your computer, even if walking away for a short time. Remember to Badge In, Badge Out.

Arrive at least 10 minutes early for your scheduled clinic. Be respectful of your patients' time; do not make them wait. Clinic practice has been for the staff to write on the white board by the front desk so your patients know when you are running late and how far behind you are (in minutes).

There are many books in the clinic that are for all of the residents and students to use. If you take one of these home, please be sure to return it.

## Communication

---

The more you communicate, the more smoothly the clinic will run. Don't hesitate to ask questions of staff, colleagues, leadership and/or faculty.

SRH email should be checked and responded to daily. This is official communication for the organization and the clinic. Communication related to patients should be done daily in EPIC, not by email.

Cell phone calls or text messaging can be used in some situations. Consider using doximity to call from our clinic as opposed to blocking your number or calling directly from your cell.

EPIC Secure Chat can be used to communicate with staff but it is not in the patient's record. All patient-related communication should be in an encounter so that it becomes a part of the patient's permanent medical record.

All communication to and from a patient or about a patient must be clearly and completely documented in an Encounter in EPIC. Document as soon as possible as accurate timelines can be important in the case of litigation. This includes every phone call. Document every attempt to contact a patient and if a message was left for someone to call back in a timely manner. This can be a critical component for patient communication, care, complaints and litigation.

## Clinic Schedules

---

All changes to your clinic schedule must go through the Program Coordinator and Program Director. Please do not ask staff to change your templates or schedules.

## Codes/ Emergencies

---

Overhead paging is not available at the residency clinic.

Although the ED is in close proximity, it is not appropriate to transport patients in any medical situation. An ambulance should be called to transport. This is for patient and staff safety and is SRH policy.

## Epic In basket/Tasking:

---

In basket work is patient care! Work your tasks daily to avoid getting behind in responding to patient needs. All In basket tasks should be completed within 48 hours. Please do not let tasks sit over the weekend.

Respond to the back office pool with explicit information, written in layman's terms, along with any action the staff need to take. Only route messages that require action by back office staff. Always route messages to the back office pool, not to an individual, unless provider to provider.

Have the patient scheduled for an appointment or call the patient yourself if the information is complex (writing a novel), a new diagnosis or multiple back and forth is needed.

Follow established In basket workflows; ask for help if needed.

Assign your In basket to a covering provider when you are out or on a rotation where working the In basket is not possible or expected. Tell the covering provider that you have assigned your In basket to them.

## Paperwork/Faxes

---

Faxes/paperwork are patient care. Avoid getting behind in responding to patient needs. All patient care items should be addressed within 48 hours.

Every provider has a folder in the locked filing cabinet in the clinic for paperwork/faxes/mail. Check your folder every time you are in the clinic and address all items promptly. You can ask your MA to get your folder and look through it also. If you are going to be away from the clinic, ask a colleague to assist with your folder.

## Nurse visits:

---

These are scheduled visits vs. walk in. All visits need to be signed off by a physician in the building at the time of the visit. Therefore, the patient may not be yours or part of your team. You may not interact at all with this patient; however, a physician must be notified of all services rendered. Orders must be in the chart prior to the visit for them to be completed by the nurse (example- vaccines or testosterone injections).

We are a provider-based billing facility; therefore, clinical staff have to complete an acuity template for each patient (facility charge). Please note that the E/M codes for acuity template vs. E/M code for physicians are often very different. This is appropriate.

## New / Established patients

---

New patients include: new to organization, new to department, or no visits for at least 3 years. Please follow trained workflows within Epic. All patients referred to us from the SRH Urgent Cares or other SRH FM clinics are considered established patients.

## Referrals and Prior Authorizations:

---

All receptionists rotate positions and are able to answer questions, process referral requests, etc. This will soon be changing to a centralized referrals dept, and you'll be updated.

Receptionists need to be verbally told if there is a STAT referral request to prevent delay in processing. Clinical staff will process Prior Authorization (PA) requests if they have all necessary information.

## Section 8 – Important Links

### Residency Training Requirements

You are responsible for understanding the requirements of your three-year residency program. You can find documents for "(FM) Program Requirements and FAQs", as well as "Osteopathic Recognition".

[Program Requirements and FAQs and Applications \(acgme.org\)](#)

[Osteopathic Recognition \(acgme.org\)](#)

### COMLEX Step 3 and USMLE Part 3 Requirements

Residents must have successfully passed COMLEX 3 (National Board of Osteopathic Medical Examiners-NBOME) or USMLE 3 (United States Medical Licensing Examinations) before receiving a contract for PGY3 or

beginning the third year of training. Failure to pass by 120 d prior to the start of the PGY3 year will result in delay or non-renewal of the resident's contract.

[www.nbome.org](http://www.nbome.org)      [www.usmle.org](http://www.usmle.org)

## FM Board Certification Requirements

Information on FM Board Exams and certification requirements can be found at the American Board of Family Medicine (ABFM) and American Osteopathic Board of Family Physicians (AOBFP):

[www.theabfm.org](http://www.theabfm.org)      [www.aobfp.org/home.html](http://www.aobfp.org/home.html)

## Memberships

All residents shall become members of the national FM organizations American Academy of Family Physicians (AAFP); and American College of Osteopathic Family Physicians (ACOFP) and American Osteopathic Association (AOA) for osteopathic residents. Membership in the American Medical Association (AMA) is voluntary.

[www.aafp.org](http://www.aafp.org)      [www.acofp.org](http://www.acofp.org)      [osteopathic.org](http://osteopathic.org)      [www.ama-assn.org](http://www.ama-assn.org)

Residents shall also become members of the state societies Washington Academy of Family Physicians (WAFP); and Washington Osteopathic Medical Association (WOMA) for osteopathic residents.

[www.wafp.net](http://www.wafp.net)      [www.woma.org](http://www.woma.org)

## Skills Certifications Required

All family medicine residents must be BLS (Basic Life Support), ACLS (Advanced Cardiac Life Support), and PALS (Pediatric Advanced Life Support) certified throughout the training program. In addition, the NRP (Neonatal Resuscitation Program) and ALSO (Advanced Life Support in Obstetrics) must be taken in the first year of training. The GME department will pay for these and will help with scheduling.

## WA Licensure

Resident trainees obtain a *Limited License* from the State of Washington.

Residents interested in Moonlighting can apply for a *Full License* in Washington after passing COMLEX 3 or USMLE 3 *and* successfully completing your first year of residency training. After residency, you will need to apply for a *Full License* to practice independently.

MDs are found under "P" for "Physician" on the WA Department of Health Website list of Professionals- and are handled by the "Washington Medical Commission":

[www.doh.wa.gov](http://www.doh.wa.gov)  
<https://wmc.wa.gov>

DOs are found under "O" for "Osteopathic Physician" on the WA Department of Health Website list of Professionals- and are handled by the "Board of Osteopathic Medicine and Surgery".

[www.doh.wa.gov](http://www.doh.wa.gov)

## Section 9 – Goals and Objectives

### Program Goals

Our goal is to produce professional, board certified family physicians capable of providing competent, independent, and professional health care service. In addition we train physicians in the full breadth of primary care to serve rural and underserved communities, as well as promote independent learning skills to provide basic health care for all people.

Through the program the resident will complete an organized program of study and experience designed to prepare him/her to provide high quality medical care. The resident is exposed to the specific aspects of family medicine discipline, practical experience, reading materials and other resources.

### Program Objectives

- A. To provide learning opportunities for each resident to develop the ability to:
  - 1. Interpret in pathophysiological terms an accurate and complete initial and continuous database obtained through patient interviewing, physical examination, and appropriate laboratory evaluation.
  - 2. Accurately diagnose and completely manage the vast majority of primary care problems common to the office practice setting.
  - 3. Focus on the family as a unit, analyzing and appreciating the forces that affect health and illness.
  - 4. Work as a cooperative health-care team member relying on the skills of other health professionals.
  - 5. Appropriately utilize available community resources indicated for holistic care, including social, nursing, legal, and religious services.
  - 6. Understand, achieve, and utilize continuous relationships with patients toward the overall betterment of care.
  - 7. Identify in epidemiologic terms the problems of the community as they affect the health of individual patients.
  - 8. Operate and manage, effectively and efficiently, the office practice setting.
  - 9. Select and utilize consultants from other disciplines at that point where diagnosis and management can be improved by such consultation.
- B. To initiate and maintain programs that provide a stimulus for learning a model of care that has a beneficial impact on medical care and medical education within the community.
- C. To enable the physician to modify his/her behavior to feel confident and at ease in dealing with people of all persuasions, convictions, and attitudes.
- D. To develop a physician's awareness of his/her own personality traits, personal capabilities, limitations, and comfort in dealing with patients, colleagues, friends and family.
- E. To create an environment within an educational model in which learning and emotional growth is a comfortable and natural process.

# Rotation Goals & Objectives

On the first page you will always find some basics about who and where to meet, any specifics/ preferences that are known about this rotation, and a short list of high yield topics or procedures to make sure you focus on. Please help us keep these updated and make them more useful for every resident by giving feedback during or after your rotation to the faculty lead so they can update the document as needed.

If you are doing a new or unique elective/ selective rotation, you will need to create and document new rotation goals and objectives. Your advisor can help you do this. There are plenty of resources online that you will be able to find and modify into our format.

*\*Refer to each rotation G&O document in New Innovations.*

## Section 10- GME Resident Policy and Procedure Manual

---

Please note that residents as learners fall under ACGME program requirements. This means that we must follow GME policies, which have been developed specifically for residents- and there may be differences from existing SRH (non-GME) policies. If there isn't a specific GME policy or guideline, then residents are expected to follow the SRH policies and procedures.

For example, there is a GME policy for paid time off and residents are subject to ACGME requirements, rather than SRH/ HR department policies that apply to other employees.

### **GME Policies:**
